

**Job Title:** Project Trainee / Intern

**Locations:** Ahmedabad

**Reports to:** Respective Department's Manager

### **A quick snapshot...**

As a Project Trainee, you will be part of the Professional Services/ AMS/ Technical Support/ IT/ Sales Engineering teams, and participate in software development project life cycle phases, including analysis, design, code development, test business software applications, project implementation and Support. You will be assisting in defining, reviewing requirements, and use cases for the application and designing the application to meet the business process design and application requirements.

### **Why it's a big deal...**

As a Project Trainee, you would work with the team to understand the business requirements and convert the requirements into full-blown technical specifications based on the modules allocated to you. You will enjoy providing end-to-end solutions to software quality problems.

### **Are you the person we're looking for?**

#### **Required.**

- Academy final year students to be graduated in 2025 - B.E/ B.Tech/ M.E/ M.Tech in CE/ CS/ IT ONLY, with more than 70% aggregate or 7.0 CGPA.
- Excellent communication skills (written and oral)
- 6 months internship followed by Employment (subjected to employment T&C).
- Willing to work in different time zones to support a global team.
- Ready to undergo training programs as required by the organization.
- Willing to work under any project/department or technology & skill sets.
- Willing to work in shifts post confirmation as FTE (Technical Support dept)
- Ready to quickly learn new in-demand technologies as needed.

**Strong communication and interpersonal skills.** You're not just comfortable engaging in collaborative discussions, but initiating them, too. You are skilled at reading and adapting to different communication styles. When you speak you are clear and concise. Your strong listening skills foster connection with our clients and allows you to accurately collect the right information so you can resolve issues in the most expedient way.

**Analytical thinker and creative problem solver.** You are able to see issues holistically and follow the flow of the stack to get to the root of the matter – a key skill in this role. But where you really shine is with your ability to identify creative solutions to unique customer requirements. This is critical for ensuring our customer issues are resolved in a manner that meets or exceeds their expectations without increasing their costs.

**Education.** A bachelor's or master's degree in computer science engineering or IT.

## **Here's what will give you an edge...**

**Adaptability and Initiative.** You are a self-starter, possess a strong commitment to detail, and can work in a rapidly changing environment. You don't wait around for things to happen or for your manager to tell you what to do. You're not only proactive about completing your work, but when you sense the need to introduce a project that will benefit the team or the organization -- even if it's outside your scope of work -- you put a proposal together, talk to the team about it, and own it. And that also goes back to having an entrepreneurial spirit.

**Clear, deliberate, and collaborative communicator.** You don't just engage in collaborative discussions; you initiate them regularly. You are clear and concise when you speak and write -- and even creative in terms of ensuring your messages are received and understood. You leave no room for assumptions or misunderstanding. It's what sets you apart from the rest.

## **Did we pique your interest?**

If this sounds like the kind of job you would love in the kind of environment where you would thrive, please click apply. We'd love to hear from you!

## **Don't meet every requirement for the role?**

Studies have shown that women and members of ethnic minorities are less likely to apply for jobs unless they meet every single qualification. At Conga we are dedicated to building a diverse, inclusive, and authentic workplace, so if you're excited about this role but your experience doesn't align perfectly with every qualification in the job description, we encourage you to apply anyway. You just might be the right candidate for this or other roles.
