Define Tomorrow

Thanks for your interest in Amazon!

How often can you say that your work truly changes the world? You'll say it often enough with us.

At Amazon, what we do touches the world every day, and you will have the opportunity to leave your imprint on our work. Here, you'll be encouraged and rewarded to disrupt the status quo, think big and redefine normal as you team with other curious and open-minded innovators. Our people will help you grow into the visionary, high-impact person you know you're ready to be. **Join us and define tomorrow.**

Where can I learn about opportunities for students?

Please visit the [Opportunities for Students](#) page on [amazon.jobs](#) to learn more about opportunities for students and new graduates. For questions about applying and interviewing at Amazon outside of Student Programs, please refer to the [Amazon.jobs](#)

What roles does Amazon recruit students for?

We recruit and hire current undergraduate and graduate students, as well as recent graduates, for internship and full-time opportunities across all lines of business (e.g., Amazon Studios and Prime Video, Amazon Web Services (AWS), Consumer, Devices and Services, Human Resources, Operations, etc.). Some roles include: software development engineers, support engineers, product managers, operations managers, applied scientists, vendor managers, and financial analysts.

In what countries does Amazon hire students for these roles?

We recruit for internships and full-time roles in more than 40 countries around the world across the Americas, Asia, Australia, Europe, the Middle East, and South Africa.

Student Programs Application Process

Application

Can I apply to multiple roles?

Yes, please apply to the role(s) that align with both your interests and skillset. You will be evaluated against the requirements for each role and may be interviewed for different roles. Please note, you will only be able to participate in one interview process at a time.

Should I apply for an internship or wait to apply for a full-time role?

We recommend applying for an internship to gain valuable work experience and learn first-hand what it's like to work at Amazon, but we still welcome direct applications to full-time roles.

Is there an application deadline for full-time or internship positions?

There are no application deadlines for internships and full-time positions; however, we encourage students to apply in late summer or early autumn to increase the likelihood of interviewing for an open role. To learn more and apply, visit the [Opportunities for Students](#) page.

Where can I find the status of my application? When will I hear back from Amazon?

You can see the status of your application in the candidate portal. To check the status of your application for all other roles, check the status of your application [here](#). We review applications throughout the year on a rolling basis and will contact you directly if we are interested in moving forward with your candidacy.

I was referred for a specific role by a current Amazonian – what do I do now?

If you are referred to a specific open role, a recruiter from the Student Programs team will reach out to have you complete your application via amazon.jobs. If your application is selected for further review, recruiter/recruiting coordinator from Student Programs will contact you directly.

What do I do if I suspect a fraudulent source is offering me a job at Amazon?

Please be cautious of common scams that offer unauthorized Amazon employment opportunities. Our recruiters who contact candidates — whether it be via text, call, or email—will never ask for banking information, or request an enrollment fee. We encourage those who think they may have been contacted by a fraudulent source offering a job on behalf of Amazon to report it

<http://www.amazondelivers.jobs/contactus> We actively investigate reported employment scams, and as a result, dozens of fraudulent recruiting websites have been taken down.

Application

Do I have to move to Seattle to work at Amazon?

No, we have Amazon offices all around the world. Learn more on our [Seattle headquarters](#) and our other [locations](#).

I work for an employment agency, temporary staffing firm, or consulting business. How can I present applicants to you?

We do not have a general resume submittal process for agencies who are not on our preferred list.

Does Amazon or its approved recruiting partners charge any fee for employment?

We do not charge any fee for employment and the same applies to the Recruitment Partners who we work with. Amazon is an equal opportunity employer. Employment decisions are based on merit. Additionally, we do not ask for any refundable security deposit to be paid in bank accounts for employment purposes. We request candidates to be cautious of misleading communications and not pay any fee/ deposit to individuals/ agencies/ employment portals on the pretext of attending Amazon interview process or seeking employment with us. These would be fraudulent in nature. Anyone dealing with such individuals/ agencies / employment portals will be doing so at his/her own risk and Amazon will not be held responsible for such loss or damage suffered directly or indirectly. Such fake job offers and appointment letters shall not be treated as any kind of offer or representation by Amazon. Please note, Amazon does not send offer letters from Hotmail, Yahoo, Gmail or any other public email accounts or demand a fee in lieu of an employment offer / interview. If you receive such e-mails, please do not pay any fee or deposit. We request that you report such offers to recruiting-feedback@amazon.com. If you have already made a payment, please log a complaint with the local police for necessary legal action to be taken.

How do I determine if I am restricted from seeking employment or having employment discussions with Amazon or its subsidiaries?

You may be restricted from having employment discussions with Amazon or its subsidiaries if you are currently participating, or previously participated, in government acquisition or other matters involving Amazon or its subsidiaries. To learn how the rules apply to your specific situation, please consult your employer's ethics officer.

Online Assessment

About Online Assessment

At Amazon, one of our highest priorities is hiring and developing the best, and we work hard to raise the performance bar with every hire. Amazon uses online assessments as one way to help us get to know you better, and we design them to measure key characteristics required for success in a role. Assessments also allow us to assess applicants consistently and equitably, as every individual is provided with the same experience and information needed to complete the assessment. Depending on the position, we may ask you to take an assessment during the application process or send it to you separately after you've applied. The type and number of assessments will depend on the role you apply for and in some cases, must be completed within a certain timeframe. The two common types of assessments are *work style assessments* and *work sample simulations*.

The Formalities

Most assessments are conducted virtually unless administered as part of a hiring event or on-site interview day.

During your assessment, be in a quiet and comfortable place with no distractions.

Review provided instructions carefully, as some assessments must be completed by a particular date. If an assessment deadline is missed, we're unable to grant extensions. Many assessments are also timed, so be sure to set aside an appropriate amount of time.

All assessments require the internet, have a computer with a reliable connection and access to email. You will be notified of any additional technical requirements in advance.

If you have any special requirements, questions or concerns, please reach out to us as we are committed to making reasonable provisions for all individuals.

Technical assistance is available for all assessments should you experience a disruption that you cannot resolve (e.g., assessment freezes or crashes). If an issue occurs, use the contact information provided in the assessment.

We take your data privacy very seriously. To learn about how we store your results review our privacy policy.

All assessments must be completed solely by the applicant.

Online Assessment

Online Assessment Tips

For any Software Development Engineer I applicants we recommend reviewing our [Software Development Topics](#) to help you prepare for technical evaluations and interviews. Just do your best.

Some questions may ask about your work style. Try not to overthink them or spend too much time on any one question. We want to get to know the authentic you, as there are many types of successful people at Amazon.

Before starting your assessment, read all the information provided carefully like timing, deadlines, and assessment types.

Work Style Assessment

These assessments are centered around Amazon's peculiar culture and [Leadership Principles](#), and typically take 10-20 minutes to complete. In these assessments, we ask you to choose the extent to which a statement represents your work style. For instance, we may ask you which of the two statements "I like for things to be clearly structured," or "I look forward to the opportunity to learn new things," best describes you.

Work Sample Simulation

These assessments ask you to complete virtual tasks related to a specific position and typically take 20 minutes - one hour to complete. They may ask you to make decisions based on our [Leadership Principles](#), complete activities critical to success at Amazon, and demonstrate your problem-solving, prioritization, and interpersonal abilities. Depending on the role you are applying for, the assessment may ask you to interpret data from a chart, answer a customer question, choose how to resolve an issue, multitask, or find the right information from multiple sources.

After Assessment

In most cases, you will be notified via email if we're moving forward with your application. You can also check your status any time in our application portal.

After you complete the assessment, you will be required to participate in a phone/virtual interview, or come on-site for an in-person interview, which allows us to dive deeper into your skills and experience to learn even more about you.

Interview

What's Amazon's interview process and how do I get started?

Visit [Interviewing at Amazon](#) to learn about each step of the application and interview process with us, from [completing the online application](#) to preparing for [phone](#) and [in-person](#) interviews.

How do I best prepare for Amazon's interview process?

To prepare for your interview, we suggest reviewing our [Leadership Principles](#). Amazonians use the Leadership Principles every day – whether we're discussing ideas for new projects or deciding the best approach to solve a problem.

We also encourage you to visit [Interviewing at Amazon](#) to learn more about the interview process and how to prepare.

Do you offer accommodations?

Depending on your current location, your recruiter/recruiting coordinator will get in contact with you should you need to travel for Amazon interviews

Before and After the Interviews

Some teams at Amazon incorporate role-specific exercises or online assessments into the interview process. You will be notified if the role you're interviewing for requires one of these.

After your interview, be on the lookout for a quick post-interview survey via email. It is important for us to know how we did so we can continually improve our process and we value your input.

Expect to hear back from recruiting within two business days following your phone screen and five business days following your interview. If you don't, feel free to give us a nudge.

Interview

Virtual Interview Formalities

During your phone interview (phone screen), be in a quiet and comfortable place with no distractions.

- Have a computer with a reliable connection and access to email. Do not use phones
- Have a copy of your resume on hand.
- Have paper and pen readily available.
- Come prepared with questions that you would like to explore in more detail (e.g. initiatives/projects, team culture, scope of role).
- If you need clarity on anything, or have any additional follow-up questions, reach out to your recruiting point of contact.
- If you've been asked to do a virtual interview, you need to download Amazon Chime, our tool for video conferencing (step-by-step guide can be found here). If you're presenting, you will need to download Chime to your desktop. The meeting ID# will be emailed to you by your recruiting point of contact. For optimal sound quality, use a headset with a microphone.

Onsite Interview

Check in: Arrive 15 minutes early, and check in for your interview. Have your government-issued photo ID ready (e.g. driver's license, Aadhaar Card).

Location: Detailed instructions will be sent to you via email. Let us know if you need any accommodations or have allergies.

Special assistance: Please let your recruiter/recruiting coordinator know a day in advance if you need any special assistance on the day of the interview.

Dress code: Comfortable and casual; most of our offices are filled with people wearing everyday clothes. We're interested in what you have to say, not what you are wearing.

What to expect: Interviews will be a mixture of questions and discussions regarding your role related functional competencies and challenges you've encountered. Be ready with detailed examples — concise, structured answers are ideal.

Interviewers: Depending on the role, you will meet with anywhere from two to five Amazonians. They will likely be a mix of managers, team members, key stakeholders from related teams, and a "Bar Raiser" (usually an objective third party from another team). All interviewers will assess potential for growth beyond the position you're interviewing for, and focus on evaluating how well your background and skills meet core competencies, along with how they relate to Amazon's Leadership Principles. We recommend approaching each of your interviews the same way, rather than trying to tailor answers to the interviewer's role.

Interview

Interviewers will often be taking notes on their laptops. It's important that they have precise notes of their time with you to share with other interviewers.

- Resume or CV: Interviewers will have a copy, but feel free to bring one as well.
- Duration: Each interview session usually lasts from 45 minutes to an hour.
- Lunch: We will provide lunch if your interview is scheduled during the lunch hour.
- Technical roles: If you're interviewing for a technical role, be prepared to white board.
- Virtual interviews: If you've been asked to do a virtual interview, you will likely need to [download Amazon Chime](#), our tool for video conferencing (step-by-step guide [here](#)). If you're presenting, you will need to [download Chime](#) to your desktop. The meeting ID# will be emailed to you by your recruiting point of contact. For optimal sound quality, use headset with a microphone.

Prep for Technical Interviews

Before you dig into the technical topics you may be asked about during your interview, connect with your recruiting point of contact to understand the subjects/skills you'll most likely be discussing and demonstrating. In general, our technical interviews typically require you to perform coding and system design white boarding exercises. Also keep in mind that invention is in our DNA, and technology is the fundamental tool we wield to evolve and improve every aspect of the experience we provide our customers. When reviewing the below topics, keep the customer top of mind. Interview preparation for tech roles (e.g. software development, machine learning) can be found [here](#).

Unsure if you're interviewing for a technical role? Reach out to your recruiting point of contact.

Tips before you head in to the interviews

Be prepared to explain what interests you about the role you're interviewing for and the team (or teams) you'll be meeting with.

When answering questions, be concise but detailed. We realize it's hard to gauge how much information is too much versus not enough. An effective test is pausing after your succinct response to ask if you've provided enough detail, or if the interviewer would like you to go into more depth.

Follow-up if you need clarification. If you are asked a question, but are not given enough information to provide a solid answer, don't be shy about asking for more information.

Interview

If additional context is not available, focus on how you would attempt to solve the problem given limited information.

For some roles, we may ask you to complete a writing sample. Why? At Amazon, we don't do PowerPoint or any other slide-oriented presentations. Instead, we write narratively structured memos and silently read one at the beginning of each meeting in a kind of "study hall." These papers generally range from one to six pages and articulate the project goal(s), approach to addressing it, outcome, and next steps.

Given this unique aspect of our culture, and the impact these papers have on what decisions we make as a company, being able to articulate your thoughts in written format is a necessary skill.

We aim to hire smart, thoughtful, and customer-obsessed people. Reflect on what motivated you to pursue a career with Amazon, and be prepared to share your thought process. Although "Why Amazon?" is a standard question, it's not a formality for process. We genuinely want to understand what inspired you to explore an opportunity with us so we get a better sense of who you are.

We try to leave a few minutes at the end of each interview to answer questions you might have, but if we don't get to all of them, please don't hesitate to ask your recruiting point of contact.

Behavioral-based Interviewing

Our interviews are rooted in behavioral-based questions which ask about past situations or challenges you've faced and how you handled them, using Leadership Principles to guide the discussion. We avoid brain teasers (e.g., "How many windows are in Manhattan?") as part of the interview process. We've researched this approach and have found that those types of questions are unreliable when it comes to predicting a candidate's success at Amazon.

Here are some examples of behavioral-based questions:

- Tell me about a time when you were faced with a problem that had a number of possible solutions. What was the problem and how did you determine the course of action? What was the outcome of that choice?
- When did you take a risk, make a mistake, or fail? How did you respond, and how did you grow from that experience?
- Describe a time you took the lead on a project.
- What did you do when you needed to motivate a group of individuals or promote collaboration on a particular project?
- How have you leveraged data to develop a strategy?

Keep in mind, Amazon is a data-driven company. When you answer questions, your focus should be on the question asked, ensure your answer is well-structured and provide examples using metrics or data if applicable. Reference recent situations whenever possible.

Tips for great answers

The STAR method is a structured manner of responding to a behavioral-based interview question by discussing the specific situation, task, action, and result of what you're describing. Practice using the STAR method to answer the behavioral-based interview questions listed above, incorporating examples from the Amazon Leadership Principles.

Ensure each answer has a beginning, middle, and end. Describe the situation or problem, the actions you took, and the outcome.

Prepare short descriptions of a handful of different situations and be ready to answer follow-up questions with greater detail. Select examples that highlight your unique skills.

Have specific examples that showcase your experience, and demonstrate that you've taken risks, succeeded, failed and grown in the process.

Specifics are key; avoid generalizations. Give a detailed account of one situation for each question you answer, and use data or metrics to support your example.

Be forthcoming and straightforward. Don't embellish or omit parts of the story.

Amazon.Jobs FAQ

I don't have an email address. Can I create an account on Amazon.jobs using my phone number?

At this time, amazon.jobs only supports sign-in using a valid email address. In the near future, however, you'll be able sign in to amazon.jobs using your phone number.

I already have an amazon.jobs account, so why do I need to reset my password?

We're working hard to provide the best candidate experience possible, so we've made some improvements to the sign-in experience. We want to make sure you're able to access all of our new features. Resetting your password will allow you to see the new and ongoing changes coming to amazon.jobs to make your experience great!

I have multiple email addresses associated with my applications. Can I merge my accounts?

Unfortunately, we are not able to merge applicant accounts. If you already have an amazon.jobs account, please kindly use the same login information to access your profile.

I forgot my amazon.jobs password. How do I recover it?

To recover your password, click 'create new or reset existing' on the sign-in screen and enter your username.

What information or features can I access with my amazon.jobs account?

With an amazon.jobs account, you can access your applicant profile, view application information, and check your application status. As amazon.jobs continues to improve and grow, we'll inform you of any new features or changes.

Do I have to upload my resume using a cloud service?

In an effort to support a more mobile-friendly experience, we've added the ability to upload your resume using cloud services. You still have the option to upload your resume from your device.

Can I upload a resume and use my LinkedIn profile?

Applicants can use LinkedIn as an alternative to uploading a traditional resume during profile creation. Unfortunately, we only accept one resume per applicant at this time, so please select the option that works best for you.

If an applicant withdraws their application, is hired for a role, or is no longer under consideration, their application will be archived.

My application status hasn't changed. Who can I contact for an update?

Your dashboard is regularly being updated to display the most up-to-date status information relating to each application. When an application status changes, your dashboard is updated in almost real-time to reflect this new status.

When does my application move from Active to Archived?

An application is considered active as long as a final decision has not yet been made. If an applicant withdraws their application, is hired for a role, or is no longer under consideration, their application will be archived.
